# Hungary

## FIELD BIOLOGY IN HUNGARY INSTRUCTOR DR. JOHN PASCARELLA

### COURSE

#### **BIOL 4080:**

This course provides students with a first-hand, off-campus, opportunity to experience biology in a specialized setting.

#### **Requirements:**

Students will need to meet general requirements to participate in a study abroad course at SHSU. Open to all majors.

### PROGRAM DETAILS

Join Dr. Pascarella and work with students and faculty from Szeged University, Hungary for two weeks of field ecology research. We will spend a week each in the mountains of Bukk National Park and the wetlands and sand dunes of Kiskunság National Park. We will also explore the historic city of Eger in between field sites. A tremendous opportunity to learn ecology and develop international relationships.

By working with students and faculty from Szeged University, you will get to know directly Hungarian people, their culture, customs, and delicious food. We will also explore the historic city of Eger, Hungary, known for its arts and wine culture, in between field sites.
